General information

name of the dataset:

full name of the dataset: *Monitoring data from the federal state Berlin (Germany)*

dataset short name: *Monitoring data Berlin*

type of dataset ([more information](#)): *species distribution data*

data type: *point data/observation data*

short description of the dataset/summary:

The dataset consists of occurrence data of the aquatic organism group macroinvertebrates that were sampled in the German federal state Berlin between 2006 and 2010. The sampling was conducted according to the protocols of the national monitoring programme for implementation of the Water Framework Directive.
